Business Insights & Recommendations

Key findings from the SQL and Power BI analysis, and what to do next

1.SALES PERFORMANCE

Sales grew every year after 2024.

2026 recorded the highest sales in the dataset, around ₹0.75M.

Growth is strong, but margin must keep pace with sales.

2. PROFITABILITY RISKS

Tables total profit

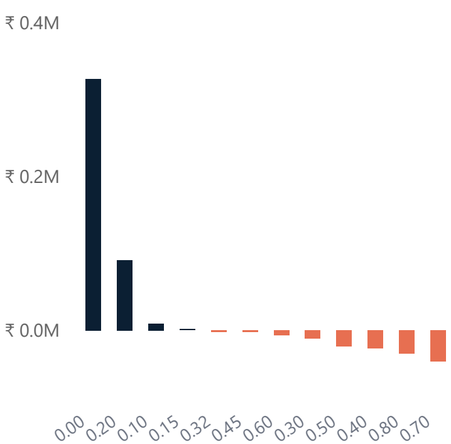

-₹17.75K

Tables is the biggest loss-making sub-category, about -₹17.8K.

Bookcases (-₹3.6K) and Supplies (-₹1.2K) also lose money.

Furniture sells well but earns only ₹19.7K profit, versus ₹146.5K for Technology.

3. DISCOUNT IMPACT

Profit is highest at low or zero discount.

As discount rises, profit turns negative.

Heavy discounting is the main driver of losses in this dataset.

4. RECOMMENDATIONS

1. Review discounts on loss-making orders and cap heavy discounts.

2. Investigate Tables and Bookcases: pricing, costs and discount levels.

3. Study what works in West (14.98% margin) and Technology, and apply it to Central (7.92% margin).
